

XC INTELLIGENT MOBILE SCREENER XC1650 - XCRUSHER.COM

Advantages and Characteristics:

Wide adaptability: the effective screening area of the vibrating screen is large, the vibration is strong, and the screening angle can be adjusted hydraulically.

The three-layer design is widely used: the three-layer design of the screening machine can screen up to 4 kinds of final products with practical value, and each finished material conveyor belt can be hydraulically folded to realize the transportation of the whole machine.

Main features: Mobile screening equipment is suitable for all natural stones and construction residues. The screening machine can be designed as double-layer or three-layer. For different particle sizes of finished products and raw materials, different screen surfaces can be selected.
